Faculty:	Jessica Ebie
Question:	Do you have any additional comments?
Response Rate:	51.35% (38 of 74)
1	no
2	no
3	nope
4	nope

5	n/a
6	When we were in the classroom things were really good Jessie was there for us at all times, once we moved to online things kind of changed. I really wish we would have eased into online testing because those can be hard for some students.
7	Very well informed about BIO and the information she teaches, and has a good teaching style that I wish more teachers had.
8	The professor's number one priority was student learning - this was very helpful.
9	The biology department is extremely knowledgeable and hands on with research; however, they could use some help with knowing how to effectively teach students.
10	Thank you!!
11	She was a very good teacher
12	She was a great instructor for the course and had the course mapped out almost to a T, but the lectures did go a bit too fast sometimes and was a bit hard to follow. otherwise great course.
13	She is such a sweet professor!
14	Professor Ebie is easily the most impactful instructor I have had in all of my years as a student.
15	No
16	No
17	None
18	None.

26	Jessie is a great professor! I love her teaching style.
27	Jessie is a very polite and professional professor. Great job!
28	Jessie cares about her students both academically and personally. Her compassion, coupled with her extensive knowledge and passion for biology and teaching, make her an excellent professor that I felt eager to learn from every day.
29	I think that Jessica Ebie was an excellent person and professor and I'm happy with the time spent in her class, but I feel that perhaps the way I learn and the way she teaches doesn't mesh as well as I'd hope. Still, a great professor!
30	I really love how Jessie showed that she cared for her students even outside of the learning classroom. For example, once we transitioned online for the rest of the semester, she would hold weekly "coffee chats" as a place for students to come to her in a relaxed environment, to just talk about things unrelated to class material or school. Also, she would personally email me to make sure things were okay, and that she also would love to work with me as a future TA. These efforts, which I have not experienced from any other professor, encourage me to do better in her class as I find myself wanting to make her proud of me as a student that she mentored for 2 semesters now. Also, it makes me look forward to her class!
31	I really appreciate how caring you are about your students, especially during these hard times, it means so much knowing I have a teacher who genuinely cares about her students, even if the content is hard.
32	I love Jessie. Favorite professor
33	I enjoy Jessie's teaching style. She is really great at engaging the students to talk with one another in order to problem solve together. I like that she teaches and learns with us, rather than talking to us like we know nothing.
34	I do not have any additional comments.
35	I am thankful for Jessie as she is definitely a shining example of what a professor should be.
36	Great professor!
37	Great job! It would be helpful to have a packet for each chapter that the students can print out. This packet could have multiple choice questions (that would allow the students to learn how to logically think through the application questions with answers and explanations provided) and any extremely important information that would help the students. Also, it would be helpful to get feedback on the practice test. By this I mean, after the practice test is over you provide a document that has the explanations as to why the answers are correct.
38	Dr. Ebie is a great professor and I would recommend her to my fellow students. She was always open to feedback from students and made sure to go over topics in depth and effectively.
