6	none
7	Very quick to respond to emails and clarified whenever possible.
8	The best entry level biology professor I have ever met. Cares and takes time with her students and is very good at learning and remembering names which makes the students feel like they are cared about even with a huge lecture hall. Great at listening stories students
9	She did great at including everybody in lectures, and making sure that everyone understood the topics. She was always there for students when they had questions, and did well at explaining things by comparing them to relatable things. Also, all the practice options and activities really helped learn the material.
10	Please be nicer and more open minded for your next semester.
11	No
12	Not really
13	No.
14	No.
15	No other additional comments from me. Thank you for being so caring for all of us students and for a good semester even with this pandemic ongoing.
16	No comments, just gratitude :)

20	I think that the slides could be more organized in that if I miss class for an appt etc. that I can read them and understand what happened. Sometimes the slides were missing so much (because it was said in class) that even AFTER I attended class I still couldn't remember what it was about.
21	I think if Jessie was able to teach us, she would have been great. But, since the course was set up that we pretty much teach ourselves, it was rough and unappealing.
22	I loved Jessie! She's always so kind and understanding and helped me understand and get through all the parts of biology that are the hardest for me. I wish her the best and I look forward to taking another class from her in the future if it's at all possible.
23	I do not.
24	Everything could be improved. I had Bang last semester and he was amazing. Jessie was not. She was rude and I learned nothing from her class because she spent the whole time talking about herself. She once devoted a whole 20 minutes of class time, which I am paying for, so her students could teach her to ride a skateboard. Not only this but she gives better grades to students she likes better. Me and my friend worked on an assignment together in which she believed we got answers from an outside source although she had no proof. She gave me a 0 while my friend got a 10/10 even though she got the same exact email. It is unprofessional and absurd. She should be fired, this is a college level course that decides my future, grade should not be based on how much the teacher likes you. Next time I will be sure to not choose her as my teacher. Being in her class was a miserable experience 10/10 would not recommend.
25	Ebie has been the best professor I have had.
